# INDIVIDUAL PENSION PLAN LORETO ÓPTIMA

QUARTERLY INFORMATION<sup>1</sup>

30th of SEPTEMBER of 2023

## Definition of the plan

Individual Pension Plan integrated into Fondloreto Pensiones, Pension Fund. The objective of the Plan is to provide participants with the highest possible absolute return (higher than inflation in Spain), under the best security and risk diversification conditions. The time horizon of the investments will not be determined by the average age of its participants and their estimated retirement age, since this will not be homogeneous.

#### **Aditional Info**

The management of financial assets of the Pension Fund is contracted with LORETO INVERSIONES SGIIC SAU (CIF A88022199), belonging to the Loreto Mutua group.

For the financial year 2023, the joint limit of individual contribution to social welfare systems is 1,500 euros per year. The amounts contributed are entitled to a reduction in the general income tax base, provided they do not exceed 30% of the net income from work/economic activities (the lesser of these amounts will be applied).

We inform you that RDL 3/2020 of February 4 and RD 738/2020 of August 4, established the preferential nature of telematic means to provide information to participants and beneficiaries of pension plans, therefore it is convenient that review your personal data in the private area of the website www.loretomutua.com and check that your email address is updated for this delivery option.

Volatility: Variable used to measure investment risk. A greater volatility implies a greater risk of the asset or market in which it is invested. Greater volatility also makes it difficult to predict the future behavior of the asset or market in which it is invested.

Sharpe Ratio: Ratio that measures the return/risk ratio, that is, the return obtained for each unit of risk assumed. The higher the Sharpe ratio, the better the relationship between return and risk of assets or markets.
